

## **Combat NCO™ 1911 A2™ T-1 Model Military Spec**

The Combat NCO meets and exceeds all known specifications for military pistol. It remains the only totally interchangeable part pistol in the world today. It is also the most patented pistol ever made with 11 issued.

The **Combat NCO 1911 A2** has the capability to handle all modern loads of .45 acp. However with the new military M1911 Ball ammo of +P with a MOV of 975 fps required some improvements to handle long term recoil. Therefore a more robust **Combat NCO™ 1911 A2 T-1 or Tactical One** model was developed and is produced today. The Combat NCO carries 11 patents and many improvements not common to other 1911 pistols.

### Specifications:

#### Patented \*
